Combustion Leak Detector LT 200.2G

Fast and accurate method to detect combustion leaks

**Find leaks in head gaskets
cylinder head and engine blocks
quickly**

Combustion gas that enters the coolant through a leak in the head gasket contains CO² gas which is detected by the LT 200.2G. As a proof for a present leak the reaction fluid will change its color

LT 200.2G
CO² Leak Detector

LT 200.2
CO² Leak Detector

- Works on gasoline and diesel engines
- Double chamber system for high accuracy
- Rubber ball for quick suction of gas
- Easy attachment to the cooling system due to rubber cone
